(1) Consistent with generally accepted accounting pronouncements, the calculation of shares outstanding for the diluted computations excludes potential common shares that would be anti-dilutive under the treasury stock method.

(2) Excludes options to purchase shares of common stock that are not in-the-money based off the average stock price for the period.

(3) Excludes restricted common stock that will vest only based upon a market condition and that market condition has not been achieved as of the period end date.
