

Colocation Information

609 W 7th Street Los Angeles, CA 90017

Crown Castle owns and operates approximately 80,000 route miles of fiber supporting small cells and fiber solutions across every major US market. We have 900+ connected data centers and 100+ colocation facilities including regen huts and pedestals.

This facility is home to one of our world-class data centers that are central to the Los Angeles digital economy. All three of our facilities are ideal for clients that require top tier performance and optimal interconnection networks. 609 West 7th Street offers leading space, power and security. This building is strategically located between the One Wilshire Building and the Carrier Center at 600 West 7th Street. Low-latency, minimal hops and fewer points of failure are top priority at all Wilshire facilities.
