Tariff Format

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14.
- C. Paragraph Numbering Sequence - There are various levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.1
 - 2.1.1.1.A
 - 2.1.1.1.A.1
- D. Check Sheets - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. An asterisk designates all revisions made in a given filing (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

Check Sheet

Pages 1 through 56 inclusive of this tariff are effective as of the date shown. Revised sheets contain all of the changes from the original tariff that are in effect as of the date indicated. page(s).

3. Rates and Charges

3.1 Rates Generally: Individual Case Basis (ICB)

Rates and charges, including minimum usage, installation, special construction and recurring charges, for the Company's Products are established at negotiated rates on an individual case basis (ICB), which may vary depending upon certain factors, including without limitation, the nature of the facilities and Products, the costs of construction and operation, the volume of traffic, the length of Product commitment by the Customer, and location. The terms of such arrangements shall be set forth in individual customer contracts and Order Forms. Unless otherwise specified, the terms, conditions, obligations, and regulations set forth in this tariff shall be incorporated into and become a part of, said contract, and shall be binding on the Company and Customer. The Company may or may not have an equivalent Product in its tariff on file with the Commission and the quoted ICB rates may be different than the tariffed rates. Customers who are similarly situated may have non-discriminatory access to requesting the Company's Products under an ICB rate. In the event of a conflict between this tariff and a contract and/or Order Form executed by the Customer and the Company, the contract and Order Form shall govern.

3.2 Calculation of Rates

- 3.2.1 To the extent that mileage is a rate element associated with a particular Product, the rates for the mileage element are based on airline mileage between rate centers of the calling and called stations. The location of rate centers is based on information provided by the incumbent local exchange carrier. Mileage is calculated using the Vertical and Horizontal (V&H) coordinate system from the National Exchange Carriers Association Tariff F.C.C. No. 4.
- 3.2.2 When Product does not begin on the first day of the month, or end on the last day of the month, the charge for the fraction of the month in which Product was furnished will be calculated on a pro rata basis.

3.3 Trial Services

The Company may offer new products, not otherwise tarified, from time to time on a trial basis subject to Commission approval where required. Such trials are limited to a predetermined period of time specified by the Company. At the Company's option, and if permitted by Commission rules, a letter outlining the trial product may be filed with the Commission in lieu of filing new or revised tariff pages.

4.1.1 Product Description

4.1.1.1 General

“Ethernet Product” or “Product” means a method of communication between or among two or more locations using the Ethernet protocol defined by IEEE 802.3. Ethernet Product may be ordered and provisioned either as On-Net Product or Off-Net Product. Ethernet Product includes, without limitation, the following types of Products:

- (a) ***E-Line***: a port-based product providing dedicated UNIs for point to point connections. E-Line supports a single EVC between two (2) UNIs. Bandwidth ranges typically between 3Mbps and 10GE
- (b) ***Ethernet Virtual Private Line (“EVPL”)***: a VLAN based product providing multiplexed UNIs allowing multiple EVCs per UNI. Bandwidth ranges typically between 3Mbps and 10GE
- (c) ***Ethernet LAN (“E-LAN”)***: a VLAN based meshed product providing many-to-many products with dedicated or product-multiplexed UNIs. E-LAN supports transparent LAN product and multipoint Layer 2 VPNs. Bandwidth ranges typically between 3Mbps and 10GE
- (d) ***Metro-E Advanced Private Line (“MAPL”)***: a dedicated point-to-point Ethernet product provided within a metro area over dedicated fiber transport. Bandwidth ranges typically between 1GE and 10GE
- (e) ***ENNI (External Network to Network Interface)***: an interconnection point between the Provider and Customer Ethernet networks as defined in MEF Specification 26. An ENNI is typically provisioned as a 1G or 10G Port.

- 4.1.1.2.B Pursuant to applicable individually negotiated agreement(s) between the Company and the Customer, at the expiration of the term plan, the Product may be converted to month-to-month billing and rated at the then prevailing rates for month-to-month Product. The Customer will also have the option of subscribing to any then effective term plan billing in lieu of Product being provided as month- to-month billing.
- 4.1.1.2.C The charges to reroute Product may be identical to a new installation.
- 4.1.1.2.D The network interface is the LAN interface on the Customer's equipment. The interface types are as follows:
- 10/100T
1000T
1000LX
1000SX
10 GigE
- 4.1.1.2.E The installation of Ethernet Product is based on a negotiated interval.
- 4.1.1.2.F The Customer is responsible for all internal wiring past the point of Company's Demarcation Point, associated equipment required in connecting the LAN to the Ethernet Optical Network equipment, and the installation operation and maintenance of any Customer-provided equipment, as specified on the applicable Order Form. The Customer is also responsible for providing the Company with space and power for the Company-provided network interface device installed at the Customer's premises.

-
- 4.1.1.2.G Any additional charges levied to the Company for space and power which are required in order to place equipment on the Company's side of the network interface will be the responsibility of the Customer.
- 4.1.1.2.H The Customer is responsible to specify in its Order Form what product configuration is to be contained in each product connection.
- 4.1.1.2.I A change in location or change of the type of circuit will be treated as a discontinuance of the existing Product and an installation of a new Product. All associated non- recurring charges will apply for the new Product. A new minimum period will be established for the new Product. The Customer will also be responsible for all outstanding minimum Product period obligations associated with the disconnected Product.

4.2 Wavelength Product

4.2.1 Product Description

4.2.1.1 General

“Wavelength Product” or “Product” means a telecommunications circuit enabled by wavelength division multiplexing (WDM) equipment. Wavelength Product may be ordered and provisioned either as On-Net Product or Off-Net Product. Wavelength Product includes, without limitation, the following types of Products:

- (a) ***Point to Point; Data Center to Data Center Connectivity-Inter Market; and Data Center to Data Center Connectivity-Intra Market:*** Dedicated circuit between two (2) locations over a shared optical fiber infrastructure. Can be configured using a variety of protocols (e.g. Ethernet, SONET, Fiber Channel, Encryption), in bandwidths ranging from 1Gbps to 100Gbps; or
- (b) ***Managed Private Optical Network (“MPON”):*** Dedicated circuit(s) between two (2) or more locations over dedicated optical fiber infrastructure and dedicated provider equipment at each location. Can be configured using a variety of protocols (e.g. Ethernet, SONET, Fiber Channel, Encryption), in bandwidths ranging from 1Gbps to 100Gbps

The Specifications applicable to Wavelength Products are as follows:

- a. ITU-T G.709, Interfaces for the Optical Transport Network (OTN)
- b. ITU-T G.693, Optical interfaces for intra-office systems
- c. ITU-T G.959.1, Optical transport network physical layer interfaces
- d. IEEE 802.3

4.2.1.2 Terms and Conditions

- 4.2.1.2.1 Wavelength Product is available for a term period of 1, 2, 3, 4 or 5 years typically. The minimum period for Wavelength Product is one year.
- 4.2.1.2.2 Pursuant to applicable individually negotiated agreement(s) between the Company and the Customer, at the expiration of the term plan, the Product may be converted to month-to-month billing and rated at the then prevailing rates for month-to-month Product. The Customer will also have the option of subscribing to any then effective term plan billing in lieu of Product being provided as month-to-month billing.
- 4.2.1.2.3 The installation of Wavelength Product is based on a negotiated interval.
- 4.2.1.2.4 The Customer is responsible for all internal wiring past the point of Company's Demarcation Point, and the installation operation and maintenance of any Customer-provided equipment, as specified on the applicable Order Form. The Customer is also responsible for providing the Company with space and power for the Company-provided equipment installed at the Customer's premises.
- 4.2.1.2.5 Any additional charges levied to the Company for space and power which are required in order to place equipment on the Company's side of the network interface will be the responsibility of the Customer.
- 4.2.1.2.6 The Customer is responsible to specify in its Order Form what product configuration is to be contained in each product connection.
