

Making cross-country collaboration possible.

OBM International (OBMI) Architecture Firm is a global architectural design and master planning firm founded in Bermuda in 1936. Today, OBMI has offices throughout the Caribbean, South America, Europe and the Middle East. On any given project, multiple groups and individuals collaborate on large-scale architectural designs across many offices and locations.

The Need

- More bandwidth to be able to share large files across offices and with clients.
- Highly available infrastructure to support business continuity.
- Access to colocation facilities connected to a solid optical backbone.
- Ability to easily upgrade network services as their business grows and needs evolve.

The Solution

- We hosted OBMI's servers in our colocation facility.
- Crown Castle upgraded OBMI to a 200Mbps internet connection to facilitate fast transfers of large project-related data files.

The Impact

- The new solution provided OBMI with the low latency connectivity they need to be able to share design files across offices, provide clients with deliverables faster and gain a competitive edge.
- With the colocation facility, they have maximum availability of their critical data and servers.
- The new cloud infrastructure allows them to better serve customers and enables collaboration.

Solution

**Colocation,
Internet Access**

“

As an architectural firm, our files are large by nature. We needed a network that travels at the speed of light. With our new network, we are confident in our ability to adapt and grow and embrace any new technologies or capabilities.

FRANK N.

OBM International Architecture

Why Crown Castle?

Our unique, nationwide portfolio

With approximately 90,000 route miles of fiber, we own and operate one of the largest and densest fiber networks in the country with a presence in 23 of the top 25 US markets.

Our proven track record

In our 30 years of experience owning and operating network assets we've seen it all and we're always ready to adapt to changing network trends.

Our deep expertise

We've worked with nearly every industry so we understand your unique opportunities and challenges and can tailor solutions to meet your goals.

Crown Castle owns, operates and leases more than 40,000 cell towers and approximately 90,000 route miles of fiber supporting small cells and fiber solutions across every major US market. This nationwide portfolio of communications infrastructure connects cities and communities to essential data, technology and wireless service—bringing information, ideas and innovations to the people and businesses that need them.
