

# Keeping your community safe.

Today, nearly 50% of households rely exclusively on wireless phones<sup>1</sup>—a number that's growing every year. That increased adoption of wireless devices has important implications for public safety, but only if the services work. Here are a few reasons it's important to make sure your community is equipped with the infrastructure that will enable its most essential wireless services.

**89%**

**OF PUBLIC SAFETY  
DECISION MAKERS**  
say that wireless data  
is just as important  
as voice.<sup>2</sup>

Remote monitoring  
of patients **REDUCES  
READMISSIONS  
BY UP TO  
44%.**<sup>3</sup>

**80%**

**OF ALL  
911 CALLS**  
originate from  
wireless devices.<sup>4</sup>

**ACCESS TO VOICE,  
VIDEO, AND DATA**  
helps first responders  
perform more  
effectively.<sup>5</sup>

**NEARLY  
50%**  
**OF SCHOOL  
ADMINISTRATORS**  
prioritize mobile  
access when  
updating emergency  
response plans.<sup>6</sup>
